Supplementary materials

Selecting oesophageal cancer patients for lymphadenectomy after neoadjuvant chemoradiotherapy: A modelling study

M. Scholte, MSc, D.J.J.M. de Gouw, MSc, B.R. Klarenbeek, MD PhD, J.P.C. Grutters, PhD, C. Rosman, MD PhD, M.M. Rovers, PhD

Supplementary figure 1

Detailed calculation of complications for the LND strategy and the selective LND strategy. In the selective LND strategy, the chances of acquiring a complication are multiplied by the relative risk of acquiring that complication without LND.
