

Table S1: Method used to convert International Prostate Severity Score (IPSS) to a utility value dependent on scores for obstructive and irritative symptoms, as suggested by Kok et al [16].**Table S1A**

Domain	Summary Score	Symptoms Level
Obstructive		
Seldom/never	≤ 4	Obstructive Score 1
About half of the time/sometimes	≥ 5 and ≤ 16	Obstructive Score 2
Almost Always	≥ 17	Obstructive Score 3
Irritative		
Seldom/never	≤ 3	Irritative Score 1
About half of the time/sometimes	≥ 4 and ≤ 9	Irritative Score 2
Almost Always	≥ 10	Irritative Score 3

Table S1B*

Irritative Score (Symptoms Level)	Obstructive Score (Symptoms Level)		
	1	2	3
1	1.00	0.97 (0.11)	0.95 (0.09)
2	0.97 (0.10)	0.94 (0.12)	0.92 (0.11)
3	0.92 (0.15)	0.90 (0.14)	0.87 (0.14)

*Data expressed as Mean (Standard Deviation)
