

### VQI Endovascular AAA Repair Inclusion Criteria:

**Endovascular AAA Repair:**

**Inclusion:** Primary endovascular repair of degenerative infrarenal aortic aneurysms that may include iliac aneurysms. Uncovered stent grafts extending above the renal arteries are included.

**Exclusions:**

- Revision of previous endografts (which is captured on the follow-up form for that procedure).
- Supra-renal covered stents with renal fenestrations or branches (which are entered under TEVAR/Complex EVAR).
- Isolated iliac aneurysms if the endograft is not placed within the aorta, which are captured as peripheral vascular interventions.
- Operations done for infected aneurysms.
- Operations done for anastomotic aneurysm (Pseudoaneurysm) after previous open repair.
- EVAR performed for non-aneurysmal infrarenal pathology, such as isolated dissection or atherosclerotic occlusive disease (the latter is captured under PVI, the former is not captured in the VQI registry).
- Repair done for trauma
